

# BEN BORLAND, CBST

## Professional Experience

Ben Borland has 25 years of construction field experience. Ben began his career in the insurance restoration field and expanded into ownership of a successful construction company. Ben then spent 10 years managing a mid-size remediation firm.

Ben has extensive hands-on field experience in the structural restoration of homes and businesses including bow string trusses, pin piling work, landslide and soils stabilization and restoration, and fire and water damage repairs.

He enjoys working with owners, architects, engineers and consultants to resolve constructability issues that arise during the design and construction phases of projects.

Ben's construction and management experience provides the knowledge base and leadership skills required to represent his clients in the investigation, and subsequent remediation, of construction defects.

Throughout his construction career and during his tenure at Corke Amento, Ben has provided support to owners, boards, attorneys, and property and facility managers in both commercial and residential projects.
