

KELLY MORROW

Professional Experience

Kelly Morrow studied at Portland State University earning a Bachelor of Science in Architecture in 2002. She went onto the University of Washington to earn her Masters of Architecture in 2006.

During her graduate studies, Kelly was employed as a cabinet maker for a small, local custom woodworking company. In 2004 Kelly worked as a Research Assistant for BetterBricks Daylighting Lab. At the lab, she consulted for architects to test building design specifications for optimal daylight and ventilation conditions to achieve sustainable high performance commercial buildings.

Kelly brings her architectural, graphics, and CAD experience to Corke Amento. She generates drawing sets, specifications, and performs product research. To ensure buildings are constructed per contract documents, Kelly performs Construction Administration services which include weekly site visits to review and document construction progress, attend weekly meetings, and review and process submittals. Through all phases of a project, Kelly strives for the highest level of collaboration and communication between all involved disciplines. She has also performed numerous forensic investigations, site visits, and project closeout/punchlist reviews and evaluations.
